

Benchmark-defined evaluation context

Tasks, inputs, required outputs, and scoring are challenge-defined.

TAR

Track 3 · in-domain

FETV

Track 7 · OOD-1

PSI-VQA

Track 8 · OOD-2

Benchmark-provided input: video clip + task instruction / question

KoreaDrive-designed submission pipeline

VLM

Shared frozen Qwen3-VL-8B-Instruct backbone

bf16 · revision 0c351dd0 · ≤16 frames · 151,200 px/frame

Task-specific control selection

TAR

Traffic Anomaly Reasoning

Frame policy

16 frames; MM:SS question-window extraction

\$6.3

Prompt program

Exact-choice reasoning; longer descriptive budgets

Output / post-processing

Final-token extraction; vocabulary normalization; BCQ voting

FETV

Fisheye Traffic Violation Understanding

Frame policy

16 frames; uniform sampling

Prompt program

One-call 13-field structured record

Output / post-processing

Schema validation; field legalization; deterministic description template

PSI-VQA

Pedestrian Situated Intent VQA

Frame policy

16 frames; real-fps metadata

Prompt program

Per-subtask prompts; BCQ voting; greedy otherwise

\$6.2

Output / post-processing

Type-specific extraction/fallback; duration-stratified prior

\$6.1

Benchmark-defined output contracts + official scorer

Organizer baselines are evaluation references only; they are not part of the KoreaDrive pipeline (see TAR baseline table).

KoreaDrive prompt program used in the submission

KoreaDrive component varied in controlled analysis (Sec. 6)
